DVD Review

Murder Call seasons 1-3

A blast from the past- I've enjoyed watching this Australian crime series on TV back in late 90's and was pleased to see it finally being released on DVD- and it is still a pretty good viewing.

Homicide detectives Tessa Vance and Steve Hayden go about solving complicated and sometimes truly bizarre crimes with the help of a small, but brilliant team, in the classic whodunit style. It is great to watch emotional, intense Tessa and by-the-book, logical Steve arrive at the solutions, with Tessa always the one connecting the clues together. Nineties fashion and technology adds to the charm! Set in Sydney, this is a little treat for the nostalgic, crime-viewing fans. -RP

The Strangers We Know by Pip Drysdale. (2019)

Charlie's heart stops when she sees on a dating app a man who is the spitting image of her husband Oliver. Surely she must be mistaken, she only got a glimpse...but she can't let it go because she's the one who took that particular photo, on their honeymoon.

This is a fast-paced thriller that no doubt will have you racing though the pages just so you can finally find out what exactly is going on. It seems pretty damn obvious that Oliver is cheating on Charlie but at the same time there is all these hints that something else is going on and so it leaves you wondering what the explanation could possibly be... A seriously enjoyable and entertaining read that was super easy to read and also very engaging. Fans of psychological thrillers and suspense novels will find this book a real treat!

Coffee Pods Recycling

Did you know that we have a coffee pod recycling box in the Library foyer?

In just over 6 months, this box has been filled **10** times!

The Nespresso website explains it best:

"Nespresso aluminium coffee capsules that are recycled with Nespresso are sent to a specialist recycling plant based in Nowra, NSW. There, the aluminium is separated from the residual coffee. The coffee is sent to an industrial composting facility to be transformed into compost, while the aluminium is recycled and sent back to the aluminium industry to produce new aluminium products."
